Transponder generation

This function is available under the tab "Special Functions" ->"Transponder Generation". With this function you can program precoded transponders for the following vehicles:
- C Class (before 1998)
- E Class (before 1998)
- G Class (before 1998)
- ML W163 (1998-2005). After you program the transponder you should also program the transponder key to the Drive Authorization System by using the special function DAS-2B
- SMART vehicles
