Name:	VW - AUTO-DETECT **(4103)**
Device:	DiagProg4
Date:	23.03.2017

CARS -> VW -> GOLF6/JETTA -> AUTO-DETECT

Function for VW Golf MK VII

Program **4103** (AUTO-DETECT), allows user to identify the odometer manufacturer in the **GOLF MK VII** vehicle from 2012 **until 06-2014**, before purchasing program **1076**. It will eliminate problems with ordering programs that doesn't support particular module.

After selecting program following message will appear:

EV_DashBoardJCIMQBAB

START AUTODETETCT … PLEASE WAIT …
PLEASE DON'T DISCONNECT POWER

EV_DashBoardJCIMQBAB

This module is manufactured by **Johnsons Control** and is not supported by DiagProg4. **Afer receiving this message client can activate program 0**.

EV_DashBoardVDDMQBAB

START AUTODETETCT … PLEASE WAIT …
PLEASE DON'T DISCONNECT POWER

EV_DashBoardVDDMQBAB

This model is manufactured by VDO Continental and is supported in **modules 2012 until 06.2014.** In this case please activate program **1076** and once it is active it will run automatically.

ATTENTION: When it comes to cars manufactures after **06.2014** following message will appear:
AUTO-DETECT Failed!!.
